Address: Family Gate Near Fortress Stadium, Lahore

SUMMARY

Dedicated and motivated final-year Computer Science student with strong expertise in MERN Stack Development, including MongoDB, Express.js, React.js, and Node.js. Skilled in developing responsive web applications, RESTful APIs, and full-stack solutions with a focus on clean code, performance, and user experience. Possess a solid understanding of programming fundamentals, object-oriented programming, database management systems, and modern web technologies. Passionate about building scalable applications and continuously learning emerging technologies. Seeking an opportunity to apply technical skills, gain industry experience, and contribute to innovative software development projects in a professional and collaborative environment

PROJECTS

Netflix Clone | HTML, CSS

I developed a responsive Netflix landing page clone using HTML and CSS, replicating the layout of the original Netflix homepage with components such as the navigation bar, hero section, and content sections. This project improved my understanding of responsive design and front-end development practices

Kidney Stone Detection Web Application | React, Appwrite, AI

I developed a web-based application for kidney stone detection by integrating an Artificial Intelligence model into the system. The frontend of the application was built using React to provide a clean and interactive user interface. Users can upload medical images through the website, and the integrated AI model analyzes the images to generate predictions related to kidney stone detection. Appwrite was used for backend services such as database management and file storage. This project helped me gain practical experience in AI model integration, web development, and building real-world AI-based applications.

Experience

Remote Internship – Elevvo Pathway

I completed a remote internship at Elevvo Pathway where I worked on practical development tasks and projects. During the internship, I applied programming and problem-solving skills to complete assigned tasks and uploaded my work on GitHub. This experience helped me improve my coding practices, understand real-world development workflows, and gain hands-on experience in software development.

EDUCATION

Bachelor Degree in Computer Science

University of Narowal, Narowal

CGPA 3.45(8th semester)

2022-2026 (continue)

Technical SKILLS

Programming

- Python
- C++

Web Development

- HTML
- CSS
- JavaScript
- React
- Node.js

Database

- MongoDB
- SQL

Data Science

- NumPy
- Pandas
- Matplotlib

AI / ML

- Machine Learning
- Deep Learning

TOOLS & TECHNOLOGIES

VS Code

Git

Appwrite

Firebase

XAMPP

INTEREST

Web Application Development

Artificial Intelligence

Machine Learning

LANGUAGES

English

Urdu
